Enterprise Information Security and Access Control Architecture

1.0 Multi-Factor Authentication Requirements

All staff must enroll hardware tokens via the MFA Enrollment Portal. Security keys must comply with the FIDO2 Alliance Standards. For backup SMS passcodes, consult the Identity Help Desk.

2.0 Password Hygiene and Rotation Protocols

Passwords must meet NIST 800-63B standards. Check the NIST Special Publication repository. Password managers are provisioned through the Enterprise Vault Download.

3.0 Data Classification and Confidentiality

Customer PII must be encrypted at rest. Review the Data Classification Matrix and the Cryptographic Standards Guide. Report accidental spills immediately.
